AFTERMARKET REPLACEMENT PARTS FROM ATRO®

The longest lasting replacement parts for all of your bushing needs.

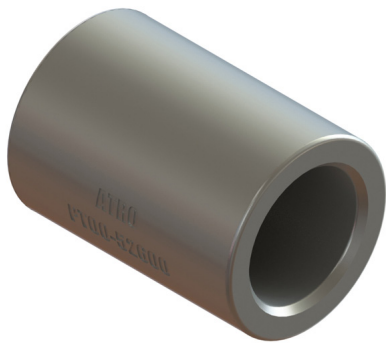

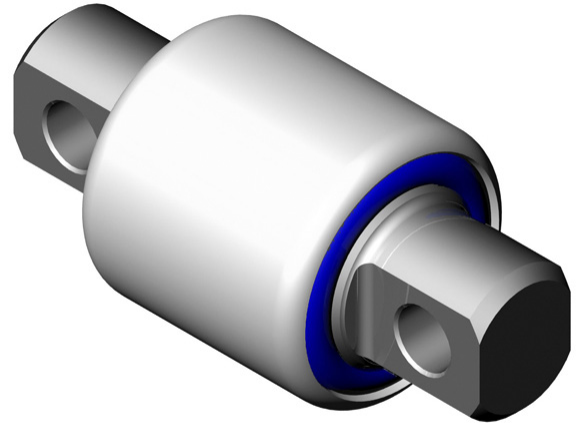

TS34000 Crimped Design

Torque Rod Bushing

Crimped outer sleeve provides:

- Increased support for polyurethane
- Increased support and strength for urethane to metal bond
- Easy installation due to radius on leading edge of bushing

New crimped design uses PT00-52600 install/removal tool

PT00-52600

Installation & Removal Tool

The redesigned, crimped TS38000 Torque Rod Bushing, now uses this installation tool.

Effective Immediately, the old style, non-crimped version will no longer be available.

ATRO recommends not mixing crimped and non-crimped bushings in the same torque rod.
