Grease Grooves

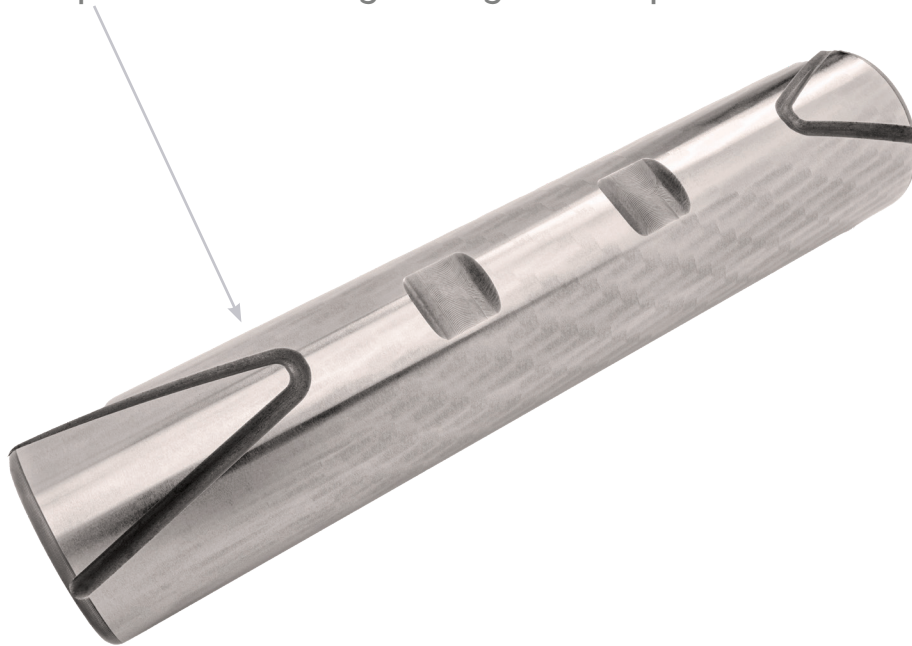

The grooves that make a difference.

Steer King precision-milled grooves ensure that grease is distributed exactly where it's needed for improved lubrication of the entire assembly. More grease in the right place enhances operation and extends the lifespan of the parts.

More grease, where it's needed.

Our precision-milled grease grooves optimize lubrication on the king pin assembly.

Grooves are standard on all kits.

- *Spiral Steel kits.*
- *Bronze kits.*
- *Ensures critical parts are lubricated.*
- *Reduces friction and wear between the king pin and the bushing.*

Especially beneficial for Bronze kits.

- *We're the only company that provides grease grooves on Bronze kits.*

More grease = better performance.

- *Lubrication of the entire assembly means better performance, increased reliability, and longer life.*

Steer King products are engineered to be long-lasting and are known for hassle-free installation, which saves time and boosts productivity for both shops and truck owners.

Steer King™ is an ATRO® brand with parts backed by the industry's best warranties. Our parts are built with pride in St. Clair, Missouri by a team who cares about delivering a quality product for you.
