

PB46-26268 Pivot Bushing

It's a more durable and reliable solution.

The PB46-26268 Pivot Bushing solves the problems of spring eye wear and bushing displacement.

The rotating pin and inbound flange prevent the bushing from wearing itself loose in the spring eye for a more durable and reliable solution.

PB46-26268 Pivot Bushing (Anti-Walk)

Keep your suspension strong and say goodbye to spring eye wear.

Common problems with rubber bushings:

Problem 1: Spring Eye Wear

- During braking and acceleration, the drive axles rotate, causing rubber bushings to rotate within the leaf spring eye, resulting in wear that makes the bushing loose.

Problem 2: Bushing Displacement

- Over time, rubber bushings shift, or "walk," out of the spring eye towards the outside of the truck, compromising the stability and safety of the suspension system.

The ATRO PB46-26268 solution.

Rotating Pin

- The pin rotates instead of the bushing
- Effectively eliminates spring eye wear

Inbound Flange

- Keeps the bushing securely in place
- Prevents shift, or "walk," out of the spring eye

Additional Benefits

- ATRO polyurethane is resistant to weather and chemicals and is 3-5 times stronger than rubber.
- Backed by the industry's best warranty
- Available in bulk as a complete pallet shipment (264 pcs).

UB20500-OS – Spring Pivot Bushing-Oversized

Product Overview

- The UB20500-OS is an oversize bushing with an outside diameter .060" larger than the PB46-26268 standard-size bushing.
- The UB20500-OS has the same anti-walk and rotating pin features found on the PB46-26268.
- We designed the UB20500-OS for applications where the spring eye has expanded up to .050" from the OEM specification. *You must replace the spring if the spring eye has expanded beyond .050".
