Equalizer Beams With Polyurethane Bushings

ATRO Equalizer Beams are engineered to withstand extreme loads and harsh environments.

By evenly distributing loads across multiple axles, ATRO equalizer beams reduce shock by up to 50%, minimizing wear and tear on suspensions while ensuring maximum tire contact for stability and safety.

EQ53-35002 Cast Equalizer Beam with Bushing
CAD Rendering

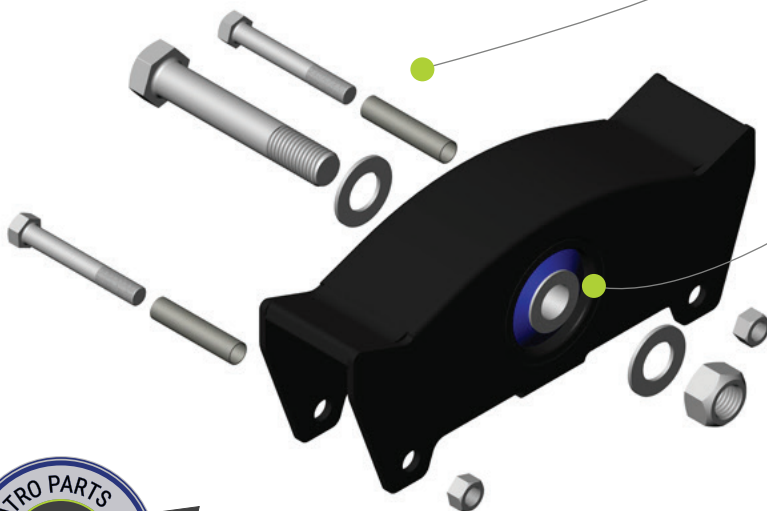

- ATRO polyurethanes are 3-5 times stronger than rubber.
- Resistant to oils, grease, road salt, and other chemicals.
- Specific compounds optimize the performance of each part.

The most durable and reliable equalizer beams for heavy truck suspensions.

Simplified maintenance with complete kits.

- **One click. One pick.**[™]
- *Everything you need in one box.*
- *New fasteners ensure proper torque.*

Two Designs Available

Standard Duty: Stamped Steel

- *Lightweight, cost-effective design*
- *Ideal for OE replacements*

Heavy Duty: Cast Iron

- *One solid piece for extreme strength*
- *For severe environments like tankers, construction, and oil field operations.*

Polyurethane Bushings

- *3-5 times stronger than rubber.*
- *Won't degrade when exposed to chemicals or weather.*

Industry Best Warranty

- *Most kits include our 3-year warranty.*
- *You can trust ATRO Parts to perform better and last longer.*
